Child/Pediatric Postdoctoral Two-year Fellowship for 2019-2021

The Center for Children's Healthy Lifestyles & Nutrition is offering one two-year postdoctoral fellowship for the 2019-2021 cycle. Applicants will be accepted from the fields of Nutrition, Exercise Physiology, Public Health, Psychology, Physiology or related fields to work with our multidisciplinary team. All applicants must have completed all requirements for their doctoral degree prior to beginning the fellowship. The position's starting date is expected to begin in the fall of 2019, and salary will follow current NIH guidance. Our faculty study many facets of children's healthy lifestyles and nutrition and related topics, and span from public health to clinical intervention to basic science (see www.chlnkc.org for more information). Candidates will select a senior faculty member (i.e., Ann Davis, Delwyn Catley, John Thyfault, Susana Patton) and a junior or clinical faculty member to lead their postdoctoral training, and will have oversight from a 4 member scholarship oversight committee to ensure productivity and training related to the candidate's individualized career goals. We are specifically seeking candidates who plan to pursue NIH funding, likely by submitting an F or K application during their fellowship. There is the opportunity to earn hours toward licensure for those seeking clinical licensure, but this is primarily a research focused fellowship. The Center for Children's Healthy Lifestyles & Nutrition is a joint partnership between the University of Kansas Medical Center (KUMC) and Children's Mercy Hospital (CMH). Postdoctoral fellows will have the support of the Office of Postdoctoral Affairs at KUMC (<http://www.kumc.edu/academic-and-student-affairs/opags/postdoctoral-affairs/prospective-postdocs.html>), as well as support from the NIH funded University of Kansas Clinical and Translational Science Institute (<http://www.kufrontiers.org/>), and from the postdoctoral training program at Children's Mercy Hospital.

HOW TO APPLY:

To apply, please submit the following documents to Ann Davis, PhD, MPH, ABPP at adavis6@kumc.edu: 1) A letter of interest identifying the position of interest, your qualifications, specific research interests, and goals for the postdoctoral training years (maximum one page). 2) Curriculum vitae; 3) Three letters of recommendation. Applications will be reviewed immediately upon receipt, and are due by December 9, 2018.

All qualified applications will be reviewed with an invitation for on-site interviews being issued soon thereafter. Candidates will be accepted for one year of employment, with successful candidates invited to stay for the second year.
