

Adolescents Ages 13-18 Needed

Teen HEALTH Study

What is the Teen HEALTH Study?

- A research study at the University of Kansas in the Clinical Child Psychology Program
- The study is about adolescents' health habits and behavior, including eating, activity, sleep, and mood.

What to Expect from Participating in the Study:

- 10 day period of time in which you will be asked to answer a daily survey on a computer or your smartphone
- Attend a visit at KU where you will complete activities and surveys
- A free water bottle and snacks will be provided at the study visit.
- You can earn up to \$40 for study completion.
